

for the  
**Washington State**  
House of Representatives

When we get to this point in session the Environmental Priorities Coalition will occasionally send out a Special Supplemental Hot List to draw your attention to a most pressing vote that is about to come your way.

---

## House Floor Action

### HB 2049: Improving Washington's solid waste management outcomes.

**SUPPORT**

Possible Floor Vote

**The Re-WRAP Act (HB 2049)** is a comprehensive bill to modernize recycling in WA. It will shift the cost of recycling from residents to producers of packaging and paper, provide curbside recycling service to all Washingtonians. [This is one of our three top priorities this session.](#)

- Stops landfilling \$104 million in recyclable materials per year in Washington and reverses the downward trend in Washington's recycling rates.
- Makes it easier and more accessible for residents to recycle with a statewide list of recyclable materials, education for residents, and curbside recycling services for all Washington residents that receive garbage service.
- Shifts costs of recycling from residents to producers
- Reduces litter, plastic pollution, and carbon emissions

**Please vote NO on amendments that may be offered by Reps Dye and Fey that will weaken the critical piece of the Re-WRAP Act: Producer Responsibility. Thank you.**
